VOLUME XXIII
— (2ND PART) —
— (Nos. 6—9) —

PUBLISHED BY
"KONINKLIJKE AKADEMIE VAN WETENSCHAPPEN", AMSTERDAM
JUNE 1922

(Translated from: „Verslagen van de Gewone Vergaderingen der Wis- en Natuurkundige Afdeeling" Dl. XXVIII en XXIX).

CONTENTS.

ABSORPTION- and extinction measurements (Photographic). Contributions to the study of liquid crystals. V. Extinction-measurements. 807.

ACCELERATION OF SOLUBILITY (On the) of metals in acids by reducible compounds. 1449.

ACID (On the crystalforms of some substituted amides of para-toluene-sulphonic). 347.

ACIDS (The solubility of some organic) in fatty oils. 783.

— (On the acceleration of solubility of metals in) by reducible compounds. 1449.

ADAPTATION (On smelling during complete exhaustion, resp.) for a given odour. 1442.

ADIABATIC INVARIANTS (On the determination of quanta-conditions by means of). 826.

ADRENAL CORTEX (Concerning the influence of the) upon the growth and the reproduction of lower organisms and its presumable antitoxis action. 1339.

ADSORPTION (On) of poisons by constituents of the animal body. II. The adsorbent power of rabbit's serum for atropin. 486.

— (On the) of odorous molecules to the surface of solids. 654.

ALKALI (The influence of different substances on the decomposition of monoses by an) and on the inversion of cane sugar by hydro-chloric acid. 149.

ALKALIROCKS (On the) of the Serra do Gericino to the northwest of Rio de Janeiro and the resemblance between the eruptive-rocks of Brazil and those of South-Africa. 1241.

ALUMINATES (The) of sodium. Equilibriums in the system Na_2O-Al_2O_3-H_2O. 129.

ALUMINIUM (The electromotive behaviour of). II. 966.

AMIDES (On the crystalforms of some substituted) of para-toluenesulphonic acid. 347.

AMINES (On some condensation-products of aromatic aldehydes and). 74.

Analyse mathématique. ARNAUD DENJOY: "Sur une propriété de séries trigonométriques." 220.

Anatomy. L. BOLK: "On the index cephalicus and the absolute dimensions of the head of the population of Holland." 103.

— M. W. WOERDEMAN: "On a human ovary with a large number of abnormal follicles and the genetic significance of this deviation." 448.

Anatomy. D. VAN VUGT: "On the homology of the M. marsupialis and the M. pyramidalis in mammals." 1119.

— G. C. HERINGA: "OMBREDANNE's theory of the" lames vasculaires" and the anatomy of the canalis cruralis." 1209.

— L. BOLK: "On the character of morphological modifications in consequence of affections of the endocrine organs." 1328.

ANIMAL BODY (On adsorption of poisons by constituents of the). II. The adsorbent power of rabbit's serum for atropin. 486.

ANIMALS (On the serological specificity of haemoglobin in different species of). 1161.

— (Concerning the sensitivity to poisons in) suffering from avitaminosis. 1170.

— (On the influence of the season on laboratory). 1192.

ANTIGEN (On heterogenetic). 1166.

ANTITOXIS ACTION (Concerning the influence of the adrenal cortex upon the growth and the reproduction of lower organisms and its presumable). 1339.

ANTONIUS (H. O.). Bemerkungen über einige Säugetierschädel von Sardinien. 37.

AQUEOUS SOLUTIONS (The existence of hydrates in). 969.

ARACHNIDA (Die Verwandtschaft der Merostomata mit den) und den anderen Abteilungen der Arthropoda. 739.

ARENDSEN HEIN (S. A.). v. HEIN (S. A. ARENDSEN).

AROMATIC ALDEHYDES and amines (On some condensation-products of). 74.

ARTHROPODA (Die Verwandtschaft der Merostomata mit den Arachnida und den anderen Abteilungen der). 739.

ASSOCIATION (On the critical quantities in the case of) when the molecular attraction is considerably increased on dissociation of the molecules to the isolated atoms, also in connection with the critical quantities of mercury. II. 282.

Astronomy. A. PANNEKOEK: "The distance of the dark Nebulae in Taurus." 707. Further remarks. 720.

— W. DE SITTER: "On the possibility of statistical equilibrium of the universe." 866.

ATOM-MODELS of LANDÉ (The tetrahedrical). 1428.

ATOMS (On the determination of the configuration of cyclic cis and trans diols and the rearrangements of) and groups of atoms during chemical reactions. 69.

— (On the critical quantities in the case of association, when the molecular attraction is considerably increased on dissociation of the molecules to the isolated) also in connection with the critical quantities of mercury. II. 282.

ATROPIN (The adsorbent power of rabbit's serum for). 486.
— (A quantitative inquiry into the antogonism pilocarpin-) on the surviving cat-gut. 628.
AVENA SATIVA (Ueber die tropistische Wirkung von rotem Licht auf Dunkelpflanzen von). 577.
AVITAMINOSIS (Concerning the sensitivity to poisons in animals suffering from). 1170.
BACTERIAL ACTIONS (Identity of the blood-digestive and gelatine-liquefying). 115.
BEAM (Graphical determination of the moments of transition of an elastically supported, statically indeterminate). II. 60.
BEAUFORT (L. F. DE). Fossils of cretaceous age in mesozoic deep-sea deposits. 997.
BECK (R. PH.) and A. SMITS. The electromotive behaviour of magnesium. I. 975.
BEEGER (N. G. W. H.). Bestimmung der Klassenzahl aller Unterkörper des Kreiskörpers der *m*-ten Einheitswurzeln. (Verbesserung). 1399.
BEMMELEN (J. F. VAN) presents a paper of Dr. H. O. ANTONIUS: "Bemerkungen über einige Säugetierschädel von Sardinien." 37.
— The colour-markings on the body of Lepidoptera, compared to those of theire larvae and pupae, and to those of their wings. 363.
— The wing-design of mimetic butterflies. 877.
BENZENE NUCLEUS (The velocity of the diazotisation reaction as a contribution to the problem of substitution in the). 249.
BERGER (G.) and F. M. JAEGER. The photochemical decomposition of potassium-cobaltioxalate and its catalysis by neutral salts. 84.
BERGH (A. A. HIJMANS VAN DEN) and P. MULLER. On serum-lipochrome. Part II. 766.
— Concerning sulphaemoglobinaemia. 1392.
BERNSTEIN (F.). Die Integralgleichung der elliptischen Thetanullfunktion. 2e Note: Allgemeine Lösung. 817.
BHATTACHARYA (D. N.), A. K. DATTA and NIL RATAN DHAR. Catalysis. VIII. 299.
BIEZENO (C. B.). Graphical determination of the moments of transition of an elastically supported, statically indeterminate beam. II. 60.
BINDING RINGS (Remark on the possible existence of) in diamond. 120.
BIRDS (Factors which are of importance for the habitformation of). I. Visual sensations. 338.
BLAAUW (A. H.) presents a paper of Dr. W. E. DE MOL: "On the influence of circumstances of culture on the habitus and partial sterility of the pollengrains of hyacinthus orientalis." 1289.
BLED frog's heart (On artificial and spontaneous changes of rhythm in the). 552.

BLOODCORPUSCLES (A direct proof of the impermeability of the) of man and of the rabbit to glucose. 1256.

BLOOD-DIGESTIVE (Identity of the) and gelatine-liquefying bacterial actions. 115.

BLOOD-PLASM (The interchange between) on one hand and humor aqueus and cerebro-spinal fluid on the other hand, studied from their sugar-percentages and in connection with the problem of combined sugar. 1343.

BOEKE (J.) presents a paper of Dr. G. STIASNY: "Ueber westindische Tornarien nebst einer Uebersicht über die bisher bekannten tentaculaten Tornarien." 2.

— presents a paper of Dr. M. W. WOERDEMAN: "On a human ovary with a large number of abnormal follicles and the genetic significance of this deviation." 448.

— presents a paper of Dr. G. C. HERINGA: "OMBREDANNE's theory of the" lames vasculaires "and the anatomy of the canalis cruralis." 1209.

BOER (J. H. DE) and F. M. JAEGER. Colloidal sulphurcompounds of ruthenium. 95.

BOER (S. DE). On fibrillation of the heart. I. 319. II. On the relation between fibrillation of the heart and "Gehäufte" extra-systoles. 329. III. Ventricular fibrillation and "Gehäufte" extra-systoles of the ventricle excited by the "Erregung" consequent on an artificial auricular systole. 533.

— On the artificial extra-pause of the ventricle of the frog's heart. 542.

— On artificial and spontaneous changes of rhythm in the bled frog's heart. 552.

BÖESEKEN (J.) and CHR. VAN LOON. On the determination of the configuration of cyclic cis and trans diols and the rearrangements of atoms and groups of atoms during chemical reactions. 69.

— presents a paper of Dr. F. GOUDRIAAN: "The aluminates of sodium. Equilibriums in the system Na_2O—Al_2 O_3—H_2O." 129.

— presents a paper of Prof. H. I. WATERMAN and J. GROOT: "The influence of different substances on the decomposition of monoses by an alkali and on the inversion of cane sugar by hydrochloric acid." 149.

— W. F. BRANDSMA and H. A. J. SCHOUTISSEN. The velocity of the diazotisation reaction as a contribution to the problem of substitution in the benzene nucleus. 249.

— presents a paper of Dr. P. E. VERKADE: "On the action of micro-organisms on organic compounds. II. The solubility of some organic acids in fatty oils." 783.

— presents a paper of Mr. H. J. Prins: "On the acceleration of solubility of metals in acids by reducible compounds." 1449.

BOLK (L.). On the index cephalicus and the absolute dimensions of the head of the population of Holland. 103.

BOLK (L.) presents a paper of Mr. D. VAN VUGT: "On the homology of the M. marsupialis and the M. pyramidalis in mammals." 1119.

— On the character of morphological modifications in consequence of affections of the endocrine organs. 1328.

Botany. TH. WEEVERS: "On the calcifuge plants of the inland dunes of the island of Goeree." 475.

— Miss CLARA ZOLLIKOFER: "Ueber die tropistische Wirkung von rotem Licht auf Dunkelpflanzen von Avena sativa." 577.

— W. E. DE MOL: "On the influence of circumstances of culture on the habitus and partial sterility of the pollengrains of hyacinthus orientalis." 1289.

— M. PINKHOF: "A new method of recording the modifications in aperture of stomata." (first comm.). 1303.

BOUMAN (P.), A. SMITS and L. V. D. LANDE. The existence of hydrates in aqueous solutions. 969.

BRANDSMA (W. F.), J. BÖESEKEN and H. A. J. SCHOUTISSEN. The velocity of the diazotisation reaction as a contribution to the problem of substitution in the benzene nucleus. 249.

BRAMSON (J.). Experimental proof for the active dilatation of cross-striated muscle-tissue. 111.

BREEDING of tenebrio molitor (Technical experiences in the). 193.

BRINKMAN (R.) and S. VAN CREVELD. A direct proof of the impermeability of the bloodcorpuscles of man and of the rabbit to glucose. 1256.

— and Miss E. VAN DAM. The significance of the concentration of calciumions for the movements of the stomach caused by stimulation of the N. vagus. 1262.

BROEKE (Miss C. VAN DEN) and W. STORM VAN LEEUWEN. A quantitative inquiry into the antogonism pilocarpin-atropin on the surviving cat-gut. 628.

BROUWER (H. A.). Crystallization and resorption in the magma of the volcano Ruang. (Sangi Islands). 561.

— Fractures and faults near the surface of moving geanticlines. I. 570.

— On the composition and the xenoliths of the lavadome of the Galunggung (West-Java). 1234.

— On the alkalirocks of the Serra de Gericino to the northwest of Rio de Janeiro and the resemblance between the eruptive-rocks of Brazil and those of South-Africa. 1241.

BROUWER (L. E. J.). Ueber eineindeutige, stetige Transformationen von Flächen in sich. (7e Mitteilung). 232.

— presents a paper of Prof. J. WOLFF: "On the theorem of PICARD." 585.

BROUWER (L. E. J.) presents a paper of Prof. F. BERNSTEIN: "Die Integralgleichung der elliptischen Thetanullfunktion. 2e Note: Allgemeine Lösung". 817.

— Intuitionistische Mengenlehre. 949.

— Besitzt jede reelle Zahl eine Dezimalbruchentwickelung? 955.

BURGER (H. C.). The process of solidification as a problem of conduction of heat. 616.

— Observations of the temperature during solidification. 691.

— and P. H. VAN CITTERT. Measurements on the intensity of spectrum lines by the aid of the echelon. 790.

BURGERS (J. M.). On the resistance of fluids and vortex motion. 774.

— Stationary streaming caused by a body in a fluid with friction. 1082.

BUTTERFLIES (The wing-design of mimetic). 877.

BIJLSMA (M. G.) and R. MAGNUS. On the pharmacological action of isoamyl-hydrocuprein (eukupin) and isoctyl hydrocuprein (vuzin). 481.

BIJVOET (J. M.), A. KARSSEN and N. H. KOLKMEIJER. Investigation by means of x-rays of the crystalstructure of sodium-chlorate and sodium-bromate. 644.

— and A. KARSSEN. Research by means of Röntgenrays on the structure of the crystals of lithium and some of its compounds with light elements. I. 1365.

CALCIFUGE PLANTS (On the) of the inland dunes of the island of Goeree. 475.

CALCIUMIONS (The significance of the concentration of) for the movements of the stomach caused by stimulation of the N. vagus 1262.

CANALIS CRURALIS (OMBREDANNE'S theory of the "lames vasculaires" and the anatomy of the). 1209.

CANE SUGAR (The influence of different substances on the decomposition of monoses by an alkali and on the inversion of) by hydrochloric acid. 149.

CAPILLARY PHENOMENON. (The osmotic pressure, regarded as a). 184.

CARDINAAL (J.) presents a paper of Prof. C. B. BIEZENO: "Graphical determination of the moments of transition of an elastically supported, statically indeterminate beam." II. 60.

— presents a paper of Prof. W. VAN DER WOUDE: "On the motion of a fixed system". 589.

— presents a paper of Prof. H. J. VAN VEEN: "Properties of congruences of rays". 1206.

CATALYSIS. Part. VII. Temperature coefficient of physiological processes. 44.

— Part. VIII. 299. Part. IX. Thermal and photochemical reactions. 308. X. Explanation of some abnormally large and small temperature coefficients. 313. XII. Some induced reactions and their mechanism. 1074.

CAT-GUT (A quantitative inquiry into the antogonism pilocarpin-atropin on the surviving). 628.

CEREBRO-SPINAL FLUID (The interchange between blood-plasm on one hand and humor aqueus and) on the other hand, studied from their sugar-percentages and in connection with the problem of combined sugar. 1343.

CERVICAL REFLEXES (On the effect of tonic labyrinthine and) upon the eye-muscles. 509.

CHEMICAL CONSTANT (Deduction of the dissociation-equilibrium from the theory of quanta and a calculation of the) based on this. 162.

CHEMICAL REACTIONS (On the determination of the configuration of cyclic cis and trans diols and the rearrangements of atoms and groups of atoms during). 69.

Chemistry. NIL RATAN DHAR: "Catalysis. Part VII. Temperature coefficient of physiological processes". 44.

— ARNAUD DENJOY: "Sur une classe de fonctions admettant une dérivée seconde généralisée". 50.

— J. BÖESEKEN and CHR. VAN LOON: "On the determination of the configuration of cyclic cis and trans diols and the rearrangements of atoms and groups of atoms during chemical reactions". 69.

— F. M. JAEGER: "On some condensation-products of aromatic aldehydes and amines". 74.

— F. M. JAEGER and G. BERGER: "The photochemical decomposition of potassium-cobaltioxalate and its catalysis by neutral salts". 84.

— F. M. JAEGER and J. H. DE BOER: "Colloidal sulphurcompounds of ruthenium". 95.

— F. GOUDRIAAN: "The aluminates of sodium. Equilibriums in the system $Na_2O—Al_2O_3—H_2O$". 129.

— H. I. WATERMAN and J. GROOT: "The influence of different substances on the decomposition of monoses by an alkali and on the inversion of cane sugar by hydrochloric acid". 149.

— J. BÖESEKEN, W. F. BRANDSMA and H. A. J. SCHOUTISSEN: "The velocity of the diazotisation reaction as a contribution to the problem of substitution in the benzene nucleus". 249.

— NIL RATAN DHAR, A. K. DATTA and D. N. BHATTACHARYA: "Catalysis". VIII. 299.

— NIL RATAN DHAR: "Catalysis". IX. Thermal and photochemical reactions". 308. X. "Explanation of some abnormally large and small temperature coefficients". 313. XII. "Some induced reactions and their mechanism". 1074.

— F. M. JAEGER: "Two isomeric chloro-tetracetyl-d-fructoses". 342.

Chemistry. F. M. JAEGER: "On the crystalforms of some substituted amides of para-toluenesulphonic acid". 347.

— F. M. JAEGER: "Some remarks concerning the Röntgenograms obtained by means of micapiles composed by crossed lamellae". 676.

— A. SMITS: "On the validity of the law of partition for the equilibrium between a mixed-crystal phase and a coexisting liquid". I. 679.

— A. SMITS and J. SPUYMAN: "The thermo-electric determination of transition points". I. 687.

— P. E. VERKADE: "On the action of micro-organisms on organic compounds. II. The solubility of some organic acids in fatty oils". 783.

— A. Smits. and G. J. DE GRUIJTER: "The electromotive behaviour of aluminium". II. 966.

— A. SMITS, L. v. d. LANDE and P. BOUMAN: "The existence of hydrates in aqueous solutions". 969

— A. SMITS and R. Ph. BECK: "The electromotive behaviour of magnesium". I. 975.

— A. SMITS and J. SPUIJMAN: "A thermo-electrical differential method for the determination of transition points of metals at comparatively low temperatures". 977.

— F. A. H. SCHREINEMAKERS: "In-, mono- and divariant equilibria." XXI. 1151.

— H. J. PRINS: "On the acceleration of solubility of metals in acids by reducible compounds." 1449.

CHLORO-TETRACETYL-d-fructoses (Two isomeric). 342.

CITTERT (P. H. VAN) and W. H. JULIUS. The general relativity theory and the solar spectrum. 522.

— and H. C. BURGER. Measurements on the intensity of spectrum lines by the aid of the echelon. 790.

CLASSE DE FONCTIONS. (Sur une) admettant une dérivée seconde généralisée. 50.

COASTREEFS (On the occurrence of Halimeda in old-miocene) of East-Borneo. 506.

COEFFICIENT (Temperature) of physiological processes. 44.

COEXISTING LIQUID (On the validity of the law of partition for the equilibrium between a mixed crystal phase and a). I. 679.

COHEN (ERNST) presents a paper of Dr. NIL RATAN DHAR: "Catalysis. Part. VII. Temperature coefficient of physiological processes." 44.

— presents a paper of Messrs. NIL RATAN DHAR, A. K. DATTA and D. N. BHATTACHARYA: "Catalysis." VIII. 299.

— presents papers of Dr. NIL RATAN DHAR: "Catalysis IX. Thermal and photochemical reactions." 308. "Catalysis X. Explanation of some abnormally large and small temperature coefficients." 313. "Catalysis XII. Some induced reactions and their mechanism." 1074.

COHESION FORCES (The) in the theory of VAN DER WAALS. 943.

COLLOIDAL sulphurcompounds of ruthenium. 95.

COLOUR-MARKINGS (The) on the body of Lepidoptera, compared to those of their larvae and pupae; and to those of their wings. 363.

COMPOUNDS (On the action of micro-organisms on organic) II. The solubility of some organic acids in fatty oils. 783.

— (On the acceleration of solubility of metals in acids by reducible). 1449.

CONCENTRATION of calciumions (The significance of the) for the movements of the stomach caused by stimulation of the N. vagus. 1262.

CONDENSATION-PRODUCTS (On some) of aromatic aldehydes and amines. 74.

CONDUCTION OF HEAT (The process of solidification as a problem of). 616.

CONGRUENCE of REYE (An involution of rays defined by a) and an involutory homology. 466.

CONGRUENCES OF RAYS (Properties of). 1206.

CORALREEFS (On the relation between the pleistocene glacial period and the origin of the Sunda-sea (Java- and South China-sea), and its influence on the distribution of) and on the land- and freshwater fauna. 395.

CRANIAL CAPACITY (On the significance of the large) of homo neandertalensis. 1271.

CRETACEOUS AGE (Fossils of) in mesozoic deep-sea deposits. 997.

CREVELD (S. VAN) and R. BRINKMAN. A direct proof of the impermeability of the bloodcorpuscles of man and of the rabbit to glucose. 1256.

— and J. DE HAAN. The interchange between blood-plasm on one hand and humor aqueus and cerebro-spinal fluid on the other hand, studied from their sugar-percentages and in connection with the problem of combined sugar. 1343.

CRITICAL QUANTITIES (On the) of mercury in connection with the increase of the molecular attraction on dissociation of the double molecules. I. 267. II. 282.

CROMMELIN (C. A.), H. KAMERLINGH ONNES and E. MATHIAS. The rectilinear diameter of hydrogen. 1175.

— and H. KAMERLINGH ONNES. Methods and apparatus used in the cryogenic laboratory. XVIII. Improved form of a hydrogen vapour cryostat for temperatures between —217° C. and —253° C. 1185.

CRYOGENIC LABORATORY (methods and apparatus used in the). XVIII. Improved form of a hydrogen vapour cryostat for temperatures between —217° C. and —253° C. 1185.

CRYSTALFORMS (On the) of some substituted amides of para- toluenesulphonic acid. 347.

CRYSTALLIZATION and resorption in the magma of the volcano Ruang. (Sangi Islands). 561.

CRYSTAL PHASE (On the validity of the law of partition for the equilibrium between a mixed) and a coexisting liquid. I. 679.

CRYSTAL-STRUCTURE (Investigation by means of *x*-rays of the) of sodium-chlorate and sodium-bromate. 644.

CRYSTALS (Contributions to the study of liquid). V. Extinction-measurements. 807.

— (Explanation of some interference curves of uniaxial and biaxial) by superposition of elliptic pencils. 1223.

— (Research by means of Röntgen-rays on the structure of the) of lithium and some of its compounds with light elements. I. 1365.

CURIE (On the deviations of liquid oxygen from the law of). 1127.

CYANOGEN-BANDS (The so-called). 727.

DAM (MISS E. VAN) and R. BRINKMAN. The significance of the concentration of calciumions for the movements of the stomach caused by stimulation of the N. vagus. 1262.

DARK NEBULAE (The distance of the) in Taurus. 707. Further remarks. 720.

DATTA (A. K.), D. N. BHATTACHARYA and NIL RATAN DHAR. Catalysis. VIII. 299.

DEMOLL (R.) and J. VERSLUYS. Die Verwandtschaft der Merostomata mit den Arachnida und den anderen Abteilungen der Arthropoda. 739.

DENJOY (ARNAUD). Sur une classe de fonctions admettant une dérivée seconde généralisée. 50.

— Sur une propriété de séries trigonométriques. 220.

DÉRIVÉE SECONDE généralisée (Sur une classe de fonctions admettant une). 50.

DEUMENS (ALPH.). Extinction by a blackened photographic plate as function of wavelength, quantity of silver, and size of the grains. 848.

DEZIMALBRUCHENTWICKELUNG (Besitzt jede reelle Zahl eine)? 955.

DIAMETER (The rectilinear) of hydrogen. 1175.

DIAMOND (Remark on the possible existence of binding rings in). 120.

DIAZOTISATION REACTION (The velocity of the) as a contribution to the problem of substitution in the benzene nucleus. 249.

DIBBETZ (G. C.), P. ZEEMAN, W. DE GROOT and Miss A. SNETHLAGE. The propagation of light in moving, transparent, solid substances. III. Measurements on the Fizeau-effect in flint glass. 1402.

DIFFERENTIAL METHOD (A thermo-electrical) for the determination of transition points of metals at comparatively low temperatures. 977.

DILATATION (Experimental proof for the active) of cross-striated muscle-tissue. 111.

DIOLS (On the determination of the configuration of cyclic sis and trans) and the rearrangements of atoms and groups of atoms during chemical reactions. 69.

DISSOCIATION (On the critical quantities of mercury in connection with the increase of the molecular attraction on) of the double molecules. I. 267. II. 282.

DISSOCIATION-EQUILIBRIUM (Deduction of the) from the theory of quanta and a calculation of the chemical constant based on this. 162.

DOUBLE MOLECULES (On the critical quantities of mercury in connection with the increase of the molecular attraction on dissociation of the). I. 267. II. 282.

DUBOIS (EUG.). The proto-Australian fossil man of Wadjak, Java. 1013.

— On the significance of the large cranial capacity of homo neandertalensis. 1271.

— On the motion of ground water in frost and thawing weather. 1321.

DUNKELFLANZEN (Ueber die tropistische Wirkung von rotem Licht auf) von Avena sativa. 577.

EAST-BORNEO (On the occurrence of Halimeda in old-miocene coastreefs of). 506.

ECHELON (Measurements on the intensity of spectrum lines by the aid of the). 790.

EHRENFEST (P.) and V. TRKAL. Deduction of the dissociation-equilibrium from the theory of quanta and a calculation of the chemical constant based on this. 162.

— presents a paper of Prof. J. M. BURGERS: "On the resistance of fluids and vortex motion". 774.

— presents a paper of Dr. G. KRUTKOW: "On the determination of quanta-conditions by means of adiabatic invariants". 826.

— Note on the paramagnetism of solids. 989.

— presents a paper of Prof. J. M. BURGERS: "Stationary streaming caused by a body in a fluid with friction". 1082.

— presents a paper of Dr. P. S. EPSTEIN: "On the principles of the theory of quanta". 1193.

— presents a paper of Mr. H. ZANSTRA: "Motion relativated by means of a hypothesis of A. FÖPPL". 1412.

EINHEITSWURZELN (Bestimmung der Klassenzahl aller Unterkörper des Kreiskörpers der m-ten). (Verbesserung). 1399.

EINSTEIN'S THEORY of gravitation (The geodesic precession: a consequence of). 729.

— (On the application of) to a stationary field of gravitation. 1052.

EINTHOVEN (W.) presents a paper of Dr. S. DE BOER: "On the artificial extra-pause of the ventricle of the frog's heart". 542.

EINTHOVEN (W.) presents a paper of Dr. S. DE BOER: "On artificial and spontaneous changes of rhythm in the bled frog's heart". 552.

— On the observation and representation of thin threads. 705.

ELECTRIC ORGAN (An inquiry into the distribution of potassium compounds in the) of the Thorn-back (Raja clavata). 842.

ELECTROLYTES (On Spray-electricity of solutions of). 658.

ELECTROMOTIVE BEHAVIOUR (The) of aluminium. II. 966.

— of magnesium. I. 975.

ELLIPTIC PENCILS (Explanation of some interference curves of uniaxial and biaxial crystals by superposition of). 1223.

ENDOCRINE organs (On the character of morphological modifications in consequence of affections of the). 1328.

EPSTEIN (P. S.). On the principles of the theory of quanta. 1193.

EQUATION OF STATE (On the) for arbitrary temperatures and volumes. Analogy with PLANCK's formula. II. 887.

EQUILIBRIA (In-, mono- and divariant). XXI. 1151.

EQUILIBRIUMS in the system Na_2O-Al_2O_3-H_2O. The aluminates of sodium. 129.

— (On the validity of the law of partition for the) between a mixed-crystal phase and a coexisting liquid. I. 679.

— (On the possibility of statistical) of the universe. 866.

ERUPTIVE-ROCKS (On the alkalirocks of the Serra do Gericino to the northwest of Rio de Janeiro and the resemblance between the) of Brazil and those of South-Africa. 1241.

EXHAUSTION (On smelling during complete) (resp. adaptation) for a given odour. 1442.

EXTINCTION-measurements (Photographic absorption- and). Contributions to the study of liquid crystals. V. Extinction-measurements. 807.

— by a blackened photographic plate as function of wavelength, quantity of silver, and size of the grains. 848.

EXTRA-PAUSE (On the artificial) of the ventricle of the frog's heart. 542.

EYE-MUSCLES (On the effect of tonic labyrinthine and cervical reflexes upon the). 509.

WEBER (MAX) and G. A. F. MOLENGRAAFF. On the relation between the pleistocene glacial period and the origin of the Sunda sea (Java- and South China-sea), and its influence on the distribution of coralreefs and on the land- and freshwater fauna. 395.

WEBER (MAX) presents a paper of Prof. J. VERSLUYS and R. DEMOLL: "Die Verwandtschaft der Merostomata mit den Arachnida und den anderen Abteilungen der Arthropoda." 739.

WEEVERS (TH.). On the calcifuge plants of the inland dunes of the island of Goeree. 475.

WENT (F. A. F. C.) presents a paper of Dr. TH. WEEVERS: "On the calcifuge plants of the inland dunes of the island of Goeree." 475.

— presents a paper of Miss Dr. CLARA ZOLLIKOFER: "Ueber die tropistische Wirkung von rotem Licht auf Dunkelpflanzen von Avena sativa." 577.

— presents a paper of Mr. M. PINKHOF: "A new method of recording the modifications in aperture of stomata." (first comm.). 1303.

WERTHEIM SALOMONSON (I. K. A.). v. SALOMONSON (I. K. A. WERTHEIM).

WING-DESIGN (The) of mimetic butterflies. 877.

WINGS (The colour-markings on the body of Lepidoptera, compared to those of their larvae and pupae, and to those of their). 363.

WINKLER (C.) presents a paper of Mrs. F. ROELS and J. FELDBRUGGE: "On the development of attention from the 8th until and including the 12th year of life." 1371.

WOERDEMAN (M. W.). On a human ovary with a large number of abnormal follicles and the genetic significance of this deviation. 448.

— An inquiry into the distribution of potassium-compounds in the electric organ of the Thorn-back (Raja clavata). 842.

WOLFF (J.). On the theorem of PICARD. 585.

WOUDE (W. VAN DER). On the motion of a fixed system. 589.

X-RAYS (Investigation by means of) of the crystalstructure of sodium-chlorate and sodium-bromate. 644.

YEAR OF LIFE (On the development of attention from the 8th until and including the 12th). 1371.

ZAHL (Besitzt jede reelle) eine Decimalbruchentwickelung? 955.

ZANSTRA (H.). Motion relativated by means of a hypothesis of A. FÖPPL. 1412.

ZEEHUISEN (H.) and H. ZWAARDEMAKER. On Spray-electricity of solutions of electrolytes. 658.

ZEEMAN (P.) presents a paper of Prof. A. SMITS: "On the validity of the law of partition for the equilibrium between a mixed-crystal phase and a coexisting liquid." I. 679.

— presents a paper of Prof. A. SMITS and J. SPUYMAN: "The thermoelectric determination of transition points." I. 687.

— presents a paper of Prof. A. SMITS and G. J. DE GRUYTER: "The electromotive behaviour of aluminium." II. 966.

ZEEMAN (P.) presents a paper of Prof. A. SMITS, L. v. d. LANDE and P. BOUMAN: "The existence of hydrates in aqueous solutions." 969.

— presents a paper of Prof. A. SMITS and R. PH. BECK: "The electromotive behaviour of magnesium." I. 975.

— presents a paper of Prof. A. SMITS and J. SPUYMAN: "A thermo-electrical differential method for the determination of transition points of metals at comparatively low temperatures." 977.

— presents a paper of Mrs J. M. BIJVOET and A. KARSSEN: "Research by means of Röntgen-rays on the structure of the crystals of lithium and some of its compounds with light elements." I. 1365.

—, W. DE GROOT, Miss A. SNETHLAGE and G. C. DIBBETZ. The propagation of light in moving transparent, solid substances. III. Measurements on the Fizeau-effect in flint glass. 1402.

ZEYDNER (J.) and W. STORM VAN LEEUWEN. On adsorption of poisons by constituents of the animal body. II. The adsorbent power of rabbit's serum for atropin. 486.

ZOLLIKOFER (Miss CLARA). Ueber die tropistische Wirkung von rotem Licht auf Dunkelpflanzen von Avena sativa. 577.

Zoology. G. STIASNY: "Ueber westindische Tornarien nebst einer Uebersicht über die bisher bekannten tentaculaten Tornarien." 2.

— H. O. ANTONIUS: "Bemerkungen über einige Säugetierschädel von Sardinien." 37.

— S. A. ARENDSEN HEIN: "Technical experiences in the breeding of tenebrio molitor." 193.

— J. F. VAN BEMMELEN: "The colour-markings of the body of Lepidoptera, compared to those of their larvae and pupae, and to those of their wings." 363.

— J. E. W. IHLE and G. J. VAN OORDT: "On the larval development of oxyuris equi (Schrank)." 603.

— J. VERSLUYS and R. DEMOLL: "Die Verwandtschaft der Merostomata mit den Arachnida und den anderen Abteilungen der Arthropoda." 739.

— J. F. VAN BEMMELEN: "The wing-design of mimetic butterflies." 877.

ZWAARDEMAKER (H.). On the adsorption of odorous molecules to the surface of solids. 654.

— and H. ZEEHUISEN. On Spray-electricity of solutions of electrolytes. 658.

— On sensibilization to radioactivity by the action of hormones. 838.

— presents a paper of Mr. M. W. WOERDEMAN: "An inquiry into the distribution of potassium-compounds in the electric organ of the Thornback (Raja clavata)." 842.

— On the influence of the season on laboratory animals. 1192.

— presents a paper of Mr. K. KOMURO: "On smelling during complete exhaustion (resp. adaptation) for a given odour." 1442.
